THE HOUSE ON THE COVER

No. 8202—A "Cover House" in every respect—from the beautiful exterior to the convenient and efficient floor plan. The living room has numerous possibilities for furniture arrangements. The fireplace is located in one corner out of cross traffic, giving the balance of the area an open effect. A planter is used between the dining and living areas to maintain open planning but a folding partition may be used for complete separation of the areas. The bedroom at the rear of the carport may be omitted if desired. The plan shows a basement under the entire house with the exception of the projecting bedroom.

Complete Plans Available

Complete working plans, specifications and mill lists are available for every design shown in any of the GARLINGHOUSE plan books. The plans are complete and ready for the builder to start construction of the home. The moderate price of these plan sets represents your best investment when building, since you know in advance what you are getting, thus avoiding misunderstandings.

THE PLANS, SPECIFICATIONS, LUMBER AND MILL LISTS as we have them made up for the designs in our books are sufficient and further details are not needed by any competent builder.

MINOR ALTERATIONS CAN BE MADE BY BUILDERS—It is impractical to change our tracings to show alterations, but minor alterations in design, material substitutions, etc., can be made by any competent builder without going to the expense of making special plans, which usually cost several times the price of our stock plans.

Complete plan sets when ordered will be mailed by parcel post (or air mail anywhere in U. S. if 75c per plan additional is included) within one day after your order has been received by The L. F. Garlinghouse Company.

TO OBTAIN COST ESTIMATES—The square and cubic footage is given for each plan to assist in figuring estimates. An estimate of what it will cost to erect any house illustrated in any of our books, in your locality, may be obtained by consulting your local builder.

ALL PLANS SENT ON MONEY BACK GUARANTEE—All Garlinghouse Plans are sent on a "Money Back If You're Not Satisfied" Guarantee. You have five full days after receiving the plans to study them over and to decide if they will serve your purpose. Plans which are not satisfactory may be returned for prompt exchange or refund.

ORDER YOUR PLANS THIS SIMPLE, EASY WAY!

USE THE HANDY ORDER BLANK ATTACHED! Or just send us your name and address with the plan number from the book and the number of sets you want along with your remittance and we'll have them in the mail within 24 hours after receipt of your order. Garlinghouse plans are complete and the house can be constructed from only one set of plans. However, in most cases, it is wise to include three or four extra sets in your order—one for the builder, a set for your city building department, a set or two for financing, if a loan is required, and of course, you will want a set for yourself to check on the construction as it progresses. Here's what you get:

PLANS—The complete working plans consist of blue prints of all four elevations, basement and all floor plans and details showing built-in features and intricate parts, all drawn to a scale of not less than one-fourth inch to one foot. Also, a plot plan in blank to be filled in locally.

SPECIFICATIONS—The specifications list in detail the con-

struction of the house from the excavation to the interior decoration.

LUMBER AND MILL LISTS—The lumber and mill lists consist of an itemized list of lumber and mill materials needed to construct the building and state where each item should be used.

No. 5968—The charm and livability of larger homes is included in this ranch-type home. The distinctive long, low lines of homes from the Southwest are quite evident in the attention-getting exterior of this popular plan. The room arrangement is excellent and although a dining room is not shown there is plenty of space in the kitchen for serving meals. This beautiful home will be an asset to any neighborhood.

No. 8152—One of the popular attractions of this up-to-date home is the all purpose room. One wall of this room is shown with a folding partition which makes the room suitable for many purposes. The position of the carport is unusual but adds to the attractiveness of the design as well as permitting easy access to both front and rear entrances.

No. 8060—Considerable time is usually spent in the preparation of meals for which reason many modern housewives prefer the kitchen located as shown on this plan. Activities in the yard, street and sidewalk are easily viewed from the kitchen and dining area. The living area located at the rear of the house assures privacy from a busy street and with the large glassed area shown, offers an excellent view of the outside surroundings. House without garage and connecting porch is only 40 feet wide.

No. 5978—The exterior of this small cottage was painted deep red to accentuate the window and door lines and to add a modern touch. The designers, keeping in mind the increasing demand for small, yet comfortable homes, planned this home with high utilization of all available space and embodied great economy of construction as evidenced by the rectangular shape, minimum hall space and efficient room arrangement.

No. 5976—One of the best liked features of this home is the location of the living room. The room has three exposures, which permits excellent ventilation and is completely separated from the sleeping area. The kitchen includes space for serving meals and is located next to the living room in the event additional dining space is required. Two large bedrooms are shown and an additional room that can serve as a bedroom, den, hobby room or small office.

No. 8164—By omitting the carport and porch, this house will be only 26' wide. The combination living and dining room extending completely across the front of the house gives a spacious appearance. There is sufficient space for dining in the kitchen area. The stairway marked "dn" leads to a full basement.

No. 8156—The stonework of the fireplace has been extended to give a distinct and sturdy appearance to this small three bedroom home. The terrace with the outdoor fireplace offers an invitation to outdoor living. The large glassed areas of the living room permit an excellent view of outside surroundings. House without extended stonework is only 38' wide.

No. 8150—The rectangular shape of the house together with the low pitch of the roof and the open car port all stress economy of construction without sacrifice of efficiency, convenience and beauty of design. The combination work and utility area and its easy access from all other rooms makes this a highly efficient and convenient plan.

No. 5987—When studying this plan one does not realize that it is perfectly rectangular. There is a definite advantage in building a home in this shape but too often the result is an uninteresting box-like exterior. Such is certainly not the case with this attractive home. Painting the front in contrasting colors and the addition of a small decorative fence relieves the plain lines and provides a pleasing contrast. The plan shows three bedrooms and a large combination living-dining room. Ample closet space has been provided and there is extra storage space in the garage.

GARLINGHOUSE plans are available as shown above or in the reverse position. On a plan that is reversed, the rooms shown on the left side of the house would be on the right side and vice versa. This is done in order that the house may be orientated to suit your lot. GARLINGHOUSE plans when requested in the reverse position are actually reverse plans not just plans printed backwards so that it is necessary to use a mirror to read the dimensions. We make up special plans in the reverse position and they are as easy to read and follow as the original plans.

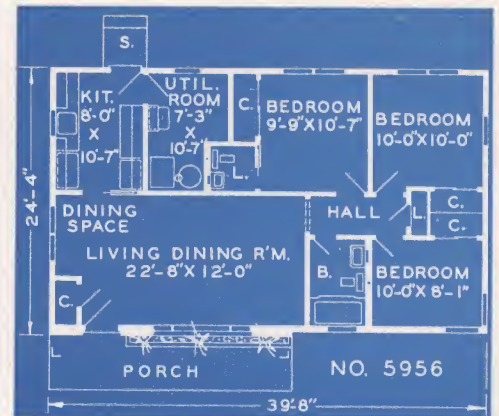

No. 5982—The living room was extended to provide additional space and to relieve the otherwise straight lines. A surprising feature of this home is the fact it contains three bedrooms as they are not readily surmised by first glance of the exterior. The rooms are a nice size and ample space for dining is included in the large kitchen-dining area. Although the home is not large, the attached garage gives it the appearance of being much wider.

No. 5956—Rectangular shaped houses are generally the most economical to construct but oftentimes they have a plain monotonous exterior. Note the excellent job the designers have done with this design. A small extension of the roof over the living-dining area relieves the plain roof lines and the use of brick and siding across the front makes a pleasing and attractive exterior. The floor plan is both efficient and convenient.

No. 5996—A handsome Western flat-top design. The demand for homes of this type is growing rapidly and against a backdrop of trees as shown here, this type of home is truly picturesque. The fine floor plan shows an ideal arrangement of rooms. Dining space is provided in the offset of the living room next to the kitchen. The location of the utility room provides an efficient location for the heating unit. Exterior walls are frame, brick veneered.

MINOR ALTERATIONS CAN BE MADE BY BUILDERS. It is impractical to change the tracings of the master plans to show alterations for individual cases. However, minor alterations in design, material substitutions, etc., can be made by any competent builder without going to the expense of making special plans, which usually costs several times the price of our stock plans.

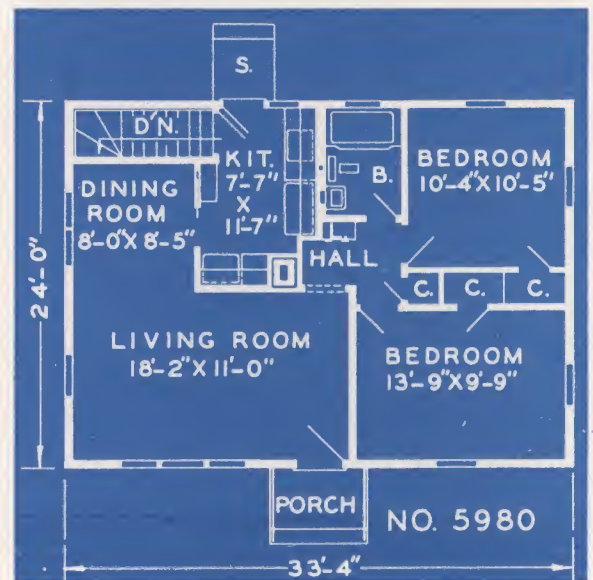

No. 5980—Compactly built, this home is designed with an eye for the utmost economy in construction, yet it provides for a small family very well. The entire floor space is used to the best advantage without sacrifice of comfort to the occupants. Note the minimum of hall space and the efficient placement of plumbing facilities in the wall separating kitchen and bath. Spaciousness is achieved by the L-arrangement of the living room and dining room. Excellent ventilation is provided in all rooms. Stairway marked "DN" leads to a full basement.

No. 8192—The modern motif of this small cottage will appeal to many prospective home builders. The family that requires only two bedrooms will find this an ideal plan. The efficient U-shaped kitchen combined with the dining area is a favorite feature. The attractive entrance with the ornamental iron rail is the focal point of the exterior. The plan includes a full basement.

No. 8184—Here is a very unusual plan. There are many features included here that are often found only in much larger homes. Note particularly the extra large living room—wonderful for entertaining, the entrance hall, combination kitchen-dining area, the full basement, etc. Brick veneer is used only on the front and gives a pleasing effect. House without garage is only 40 feet wide.

No. 8174—Designed for economy in construction without sacrifice of good exterior lines, this plan avoids the monotony of exterior design too often found in rectangular shaped homes. The false gable, excellent window treatment, combination of siding and the stone planting box give a clean-cut, modern exterior. The highly efficient floor plan utilizes each foot of space to the best advantage.

No. 5942—Here is another new and modern design that reflects good taste. The planting box and unique pattern of the brick in the fireplace chimney are used to good advantage to give a distinctive appearance to the exterior. A planter is used to divide the living room and dining space making the living room appear much larger. The stairway marked “DN” leads to a full basement.

The “reverse” of a plan means that the rooms which are shown on the left in the photo and floor diagram would be placed on the right. All dimensions and proportions are retained in the plan as reversed. To obtain the effect of a reversed plan hold the photo to a strong light and look through the rear side. Reverses are provided to allow you to orient the house to suit your lot.

No. 5904—One of the attractive features of this home is the inviting front porch. The unique arrangement of the supports and the simple design of the railing result in the modern appearance. No basement is shown but ample storage and closet space has been provided. The exterior walls are frame, brick veneered.

MINOR ALTERATIONS CAN BE MADE BY BUILDERS. It is impractical to change the tracings of the master plans to show alterations for individual cases. However, minor alterations in design, material substitutions, etc., can be made by any competent builder without going to the expense of making special plans, which usually costs several times the price of our stock plans.

No. 8196—The family requiring three bedrooms will enjoy this outstanding plan. The small bedroom may be used as a den, study or hobby room after a third bedroom is no longer required. The L-shaped living-dining room adds spaciousness to the home. The pleasing exterior lines are a result of the pleasant blending of horizontal and vertical siding painted in contrasting colors and the use of stone across the front of the living room. This home will make an attractive addition to any neighborhood.

No. 8216—One of the attention getting features of this popular plan is the unique window in the living room. This window is projected out at the top which not only results in an unusual effect but affords some protection from the direct rays of the sun. This home although rather small in area requires a fairly wide lot due to the garage arrangement. Entering the garage as indicated on the plan permits the addition of the porch which is an inviting spot during the summer months.

GARLINGHOUSE plans are available as shown above or in the reverse position. On a plan that is reversed, the rooms shown on the left side of the house would be on the right side and vice versa. This is done in order that the house may be orientated to suit your lot. GARLINGHOUSE plans when requested in the reversed position are actually reversed plans not just plans printed backwards so that it is necessary to use a mirror to read the dimensions. We make up special plans in the reverse position and they are as easy to read and follow as the original plans.

No. 5974—This small cottage type home is definitely a find where economy of construction is concerned. The interior provides for compact but comfortable living. If you do not find the home you are looking for in this book perhaps it might be in one of the other books listed on the back cover. You will note that the homes shown in Garlinghouse plan books are not hastily drawn illegible pencil sketches but are clear photographs which make it easy for you to determine how the home will appear after construction.

No. 5988—There are many notable features that the discriminating builder will notice at once in this practical yet attractive American home. The plan has been designed for the small family that seeks comfort, convenience and ease of living. The efficient and interesting floor plan, with emphasis on convenience, will delight the modern homemaker. The screen porch is an inviting spot during the hot summer months.

In purchasing your construction plans from the L. F. Garlinghouse Co., Inc. you are dealing with America's pioneer plan service—one that has had 45 years of experience in designing homes which are lived in and enjoyed by more than 1,000,000 persons.

Garlinghouse Plans are complete! They include the information necessary for contractor bids, financing, building permits, and of course, for the builder to construct the home for you. One set of plans is all that is actually required to build a home, but in most cases, it is wise to order three or four extra sets—one for the builder, a set for your city building department, a set or two for financing if a loan is required, and of course, you want a set for yourself to check on the construction as it progresses.

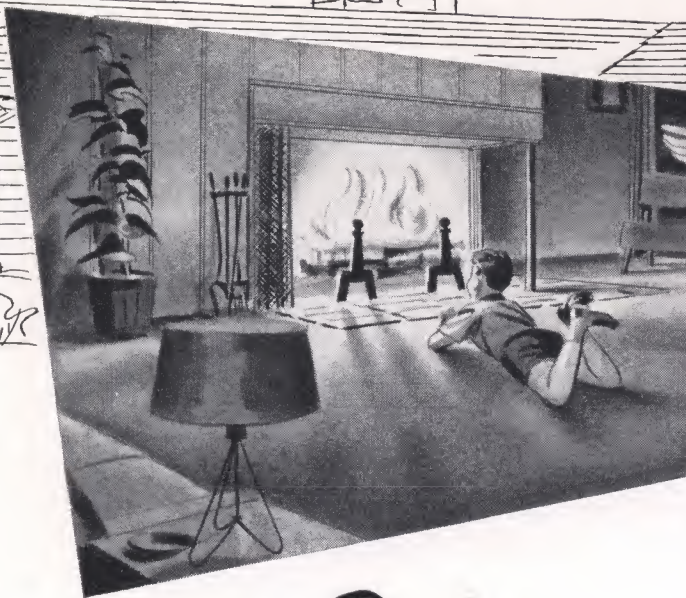

The most satisfactory way of obtaining an accurate estimate of the cost of the house that you intend to build is to purchase a set of plans and have your material dealer or contractor figure directly from those plans. Then there is no error, which is often the case if approximations are made on a square foot or cubic-foot basis.

Complete Plans Available—

Select the design for you new home from a Garlinghouse Plan Book and send for the complete plans, specifications, lumber and mill lists. Secure them from your dealer, Loan Company, or The L. F. Garlinghouse Company, Inc., Topeka, Kansas. Plans for every design in this book and all the books listed on the back cover are available for prompt shipment on receipt of order.
